# Anzen Expands Collateral Backing with Institutional Fund Products from Superstate

Bridging DeFi and TradFi: Strengthening USDz with Institutional-Grade Collateral

At Anzen, we are committed to building a stable, yield-bearing portfolio that remains resilient across market cycles. Today, we're excited to announce a major step forward in that mission: the expansion of USDz's collateral framework to include institutional-grade fund products from [Superstate](#).

## ANZEN & SIC

ANZEN ADDS INSTITUTIONAL FUND PRODUCTS FROM SUPERSTATE AS COLLATERAL BACKING. THIS RAISES ASSET QUALITY AND IMPROVES BALANCE SHEET STRENGTH THROUGH REGULATED, YIELD BEARING PRODUCTS. YOUR RISK PROFILE IMPROVES WHILE TRUST FROM INSTITUTIONAL CAPITAL INCREASES.

In May, @SuperstateInc launched Opening Bell, a platform designed to #tokenize and enable compliant #onchain activity for SEC-registered equities.

@SuperstateInc

## SUPERSTATE

SUPERSTATE LAUNCHED OPENING BELL TO MOVE SEC REGISTERED EQUITIES ONTO BLOCKCHAIN RAILS. THIS ENABLES COMPLIANT TRADING, SETTLEMENT, AND OWNERSHIP TRACKING ONCHAIN INSTEAD OF LEGACY SYSTEMS. YOU GET FASTER SETTLEMENT, CLEARER TRANSPARENCY, AND A DIRECT BRIDGE BETWEEN PUBLIC MARKETS AND CRYPTO INFRASTRUCTURE.
